The Ultimate Guide to Candlestick Chart Patterns is your 'candlestick patterns cheat sheet' for making technical trading decisions. Learn to spot trends and act on them intelligently. This book has everything you need: An introduction to candlestick chart patterns and why they can take your trading to the next level 30+ detailed candlestick patterns with a historical example for every chart Exit and entry suggestions Candlestick chart pattern trading tips Real trading examples from TrendSpider From the book: HOW TO READ CANDLESTICK CHARTS A candlestick is a type of chart used in trading as a visual representation of past and current price action in specified time frames. Depending on the time frame of the chart, each candlestick consists of minutes, a day, a week or a month trading range. On an intraday chart, a candle might represent periods of time like 1-minute, 5-minutes, 15-minutes or one hour. A daily shows candles that represent each day's trading range. A weekly chart shows candles that represent each week's trading range. A monthly chart shows candles that represent each month's trading range. Note that during the day, a daily candle will change as the range changes and price reaches a final, closing price. Similarly, during the week and in the middle of the month, the candles in those time frames are still changing and are not finalized until their time frame closes. At the end of the day, week or month, the candle for that time period is finalized. A candlestick consists of the body with an upper or lower wick or shadow. Most candlestick charts show a higher close than the open as either a green or white candle. The opening price as the bottom of the candle and the closing price as the high of the candle. Also, most candlestick charts show a lower close than the open represented as a red or black candle, with the opening price as the top of the candle body and the closing price as the low of the candle body. ...and much more! By the time you finish this book, I think you'll agree that candlesticks are the best type of charts for most traders to use for trading price action patterns.

You will be shown the various additional forms such as spinning tops, shadows, and doji. Next, the various different candle lines are outlined in full detail, showing you dozens of different formations including the single candle lines of "the hammer", "the hanging man", and "the shooting star", the dual candle lines of "dark cloud over", "the piercing pattern", "the engulfing pattern", "last engulfing pattern", and "harami". Analysis of candle lines and the technical aspects, including how to discern stops, the risk/reward in each line, trends, the use of computers, and how to place and offset trades will supply you with the necessary information you need to read the candle lines. By interviewing dozens of experts in the reading and analysis of candle charts, this book is able to provide a comprehensive perspective of candle charts and how you can start using moving averages, analyzing three line break charts, renko charts, and kagi charts. To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.
