This book explores C. G. Jung's psychology through the perspective of the existential philosopher Nikolai Berdyaev, drawing striking parallels between Jung's theory of individuation and Berdyaev's understanding of the person. Placing Jung and Berdyaev firmly within the context of secular humanism, Nicolaus draws on their personal experiences of individuation to show how both writers seek to enable a renewal of our self-understanding as persons in a post-religious society. Topics of discussion include: the foundations of Berdyaev's personalism Jung's psychological interpretation of the Christian God-image individuation and the ethics of creativity. C. G. Jung and Nikolai Berdyaev: Individuation and the Person offers a fresh perspective on the ethical implications of Jung's theory and serves also as an introduction to Berdyaev's thought. As such this book will appeal to analytical psychologists, scholars engaged with Jungian thought and all those interested in the interface between spirituality and depth psychology.

sense of possessing infinite wisdom and understanding at the moment of union. Subjectively there is an intense feeling of ecstasy or bliss which makes the orgasm of sexual union seem as nothing compared to it. To attain this state it is necessary to undertake certain disciplines that lead to non-attachment; the author provides eight progressive Yoga routines for this purpose. Clear and precise instructions are given to aid the earnest seeker. They are designed to eliminate mental, emotional, and physical disturbances from one's life. The final stages outlined in this work consist of Dharana, (concentration) and Dhyana, (sustained concentration) which lead ultimately to the attainment of Samadhi or Cosmic Consciousness.

CONSCIOUSNESS OR SUPERCONSCIOUSNESS THIS IS THE DILEMMA The present society continues to run like a mad elephant, toward global catastrophe. Why do we continue on this road that leads us to a dead end, with end view our own self-destruction? The answer to this question lies in human consciousness itself, the cause of every problem, while Superconsciousness is the solution to every difficulty. What is the difference between consciousness and Superconsciousness? Superconsciousness consciously connects us with everything that exists, and to understand it better we can make the analogy of a network: everything in existence is like a node that can have the illusion of being separate

from the rest of the network. Most people are like that, they feel like a node separated from the rest, like a single individual separated from the rest of Humanity. This feeling of separation is the mode in which consciousness operates. CONSCIOUSNESS OR SUPERCONSCIENCE THAT IS THE DILEMMA The present society continues to run like a mad elephant, toward global catastrophe. Why do we continue on this road that leads us to a dead end, with end view our own self-destruction? The answer to this question lies in human consciousness itself, the cause of every problem, while Superconsciousness is the solution to every difficulty. What is the difference between consciousness and Superconsciousness? Superconsciousness consciously connects us with everything that exists, and to understand it better we can make the analogy of a network: everything in existence is like a node that can have the illusion of being separate from the rest of the network. Most people are like this, feeling like a knot separated from the rest, like a single individual separated from the rest of Humanity. This feeling of separation is the mode in which consciousness operates. So it is "normal" for a world dominated by consciousness to be in perpetual conflict, consciousness can only do so much by being a principle of division and separation. And as long as it is the same that decides both our personal and Humanity's fate, we will always be at risk of self-destruction. We can even say, "The very nature of consciousness, directed toward separation and competition, can only inevitably lead us into conflict with others." It is the very nature of ordinary consciousness that leads us to violence and war! Superconsciousness knows that it is both the node and the global network itself at the same time, so it knows that it is deeply connected and interconnected to the Whole, while consciousness thinks it is a node unto itself, separate from the rest of the network. Superconsciousness thus opens us to a wider reality than that of ordinary consciousness, and we get a taste of it in moments of deep Inner Peace, when the silent mind allows us to enjoy to the fullest the spectacle of the present moment. Why is consciousness on the world's bridge of command and Superconsciousness all but ignored? Superconsciousness is something unpredictable and original capable of subverting the established order. The emergence on this planet, of a minimum sufficient number of awakening Superconsciousnesses, is the greatest nightmare for the system and for the Anti-

Awakening Dark Powers that rule the world. This is the problem, the ruling elites do not want Superconsciousness awakening because it would put an end to their millennial earthly Power. Only by electing Superconsciousness, as the Supreme Commander of human life, will it be possible to change human destiny and put the extraordinary scientific progress implemented by consciousness no longer at the service of consciousness itself in command, which we might rather describe as "unconsciousness ruling the world," but to put technological progress at the service of Superconsciousness, the only one capable of fostering development that is healthy, sensible, and truly aimed at the welfare of H Translator: Nikkita

Explains the relevance of ancient myths to the awakening to higher states of consciousness and enlivened experience of the world • Shows how higher consciousness can arise within each of us by following the guidance found in ancient myths • Reveals how myths influence our personal development without our awareness through their influence on our core values and culture • Examines ancient Sumerian, Egyptian, Babylonian, and Hebrew myths, such as the Epic of Gilgamesh and the story of Osiris and Isis

In this study of ancient Sumerian, Egyptian, Babylonian, and Hebrew myths, authors Lloyd M. Dickie and Paul R. Boudreau show that many classic myths contain instructions for awakening higher consciousness, allowing access to enlivened experience of the world and awareness of the divine within and around

us. Inspired by the work of R. A. Schwaller de Lubicz, the authors deeply examine creation myths and well-known ancient myths from Mesopotamia and Egypt, such as the Epic of Gilgamesh and the story of Osiris and Isis. They reveal that these myths are not behavioral morality tales but actual delineations of how a higher order can arise within each of us. The authors explain how these stories teach us to distinguish the heaven within from the earth within us, to find the essential part of our being that provides a link with our higher powers. Spending more than a year onsite in Egypt to personally connect with the myths, the authors explain how ancient storytellers intentionally chose myths as a vehicle for teachings because story has a seed-like capacity to implant itself in the unconscious and influence development without the individual being aware of it. By crafting these sacred narratives, the ancient Sumerians and Egyptians provide tools to awaken to the presence of higher consciousness as well as a road map for the individual to come into conscious alignment with the perpetual unfolding of the universe.

It is possible for anyone to make the conscious decision to develop, rekindle, or magnify the powers of their intuitive voice—their psychic mind. This book is written to discuss what it means to be psychic. The path to the supernatural world of the psychic begins by expanding and fine-tuning intuition, then paying close attention to both the seen and unseen world that surrounds us. Our minds are not simply an appendage of our bodies like arms or legs. The mind is a powerful tool from which we can access universal truths and expand our understanding of our inner selves. If you find yourself moved by a strong suspicion that there is more to life than what can be seen or easily explained, then this book is for you. If you find yourself with an overwhelming desire to explore what lies outside the realm of physical science or earthly understanding, this book will inform you. If you want to know what abilities function outside the domain of natural laws, this book will enlighten you.

Lulu.com Karma is generally understood as personal, and clearing karma is often considered an individual effort, with individual rewards. In *Opening Our Spiritual Eyes*, spiritual teacher Sri'ama Qala Phoenix shows how karmic clearing can also be used in collective healing. Karma is shared within families and communities, and clearing karma releases it from the etheric body of our children and future generations. The book was inspired by the ongoing "Celestial Project," a four-year global endeavor of Australia's Divine University that began in 2009. The project involves people gathering worldwide on specific dates to focus on the karmic cleaning of the etheric body of a major city. *Opening Our Spiritual Eyes* draws on the author's experiences of meeting the Enlightened Masters, those wise spirit guides who, through her, present new understandings of the collective karma held within the world's primary cities and our etheric bodies—and how to free ourselves, our families, and our world from it with grace. Revealing what Sri'ama Qala Phoenix calls "the true nature of the divine plan for humanity and our Earth," the book shares essential keys for how we can become empowered to live in alignment with our divine purpose.

If, as Buddhism claims, the potential for awakening exists in all human beings, we should be able to map the phenomenon with the same science we apply to other forms of consciousness. A student of cognitive social science and a Zen practitioner for more than forty years, Richard P. Boyle brings his sophisticated perspective to bear on the development of a theoretical model for both ordinary and awakened consciousness. Boyle conducts probing interviews with eleven prominent Western Buddhist teachers (Shinzen Young, John Tarrant, Ken McLeod, Ajahn Amaro, Martine Batchelor, Shaila Catherine, Gil Fronsdal, Stephen Batchelor, Pat Enkyo O'Hara, Bernie Glassman, and Joseph Goldstein) and one scientist (James Austin) who have experienced awakening. From the paths

they traveled to enlightenment and their descriptions of the experience, he derives three fundamental properties of awakened consciousness. He then constructs an overarching model that explains how Buddhist practices help free the mind from attachments to reality and the self and make possible the three properties of awakening. Specifically, these teachers describe how they worked to control attention and quiet the mind, detach from ideas and habits, and open themselves to compassion. Boyle's account incorporates current theories of consciousness, sociological insights, and research in neuroscience to advance the study of awakened consciousness and help an even greater number of people to realize it. *Awakening to Wholeness* Routledge
