These are the
proceedings of
the First
International
Conference on

Compu- tional
Logic (CL
2000) which
was held at
Imperial
College in
London from
24th to 28th
July, 2000.
The theme of
the
conference
covered all

aspects of the
theory,
implementatio
n, and
application of
computational
logic, where
computational
logic is to be
understood
broadly as the
use of logic in
computer

science. The conference was collocated with the following events: { 6th International Conference on Rules and Objects in Databases (DOOD 2000) { 10th International Workshop on Logic-based Program Synthesis and Transformation (LOPSTR 2000) { 10th International Conference on Inductive Logic Programming (ILP 2000). CL 2000 consisted of seven streams: { Program Development (LOPSTR 2000) { Logic Programming: Theory and Extensions { Constraints { Automated Deduction: Putting Theory into Practice { Knowledge Representation and Non-monotonic Reasoning { Database Systems (DOOD 2000) { Logic Programming: Implementations and Applications. The LOPSTR 2000 workshop constituted the program development stream and the DOOD 2000 conference constituted the database systems stream. Each stream had its own chair and program committee, which autonomously selected the papers in the area of the stream. Overall, 176 papers were submitted, of which 86 were selected to be presented at the conference and appear in these proceedings. The acceptance rate was uniform across the streams.

In addition, LOPSTR 2000 accepted about 15 extended abstracts to be presented at the conference in the program development stream.

Biopolymers: Applications and Trends provides an up-to-date summary of the varying market applications of biopolymers characterized by biodegradability and sustainability.

It includes tables with the commercial names and properties of each biopolymer family, along with biopolymers for each marketing segment, not only presenting all the major market players, but also highlighting trends and new developments in products. The book includes a thorough breakdown of the vast range of application areas,

including medical and pharmaceutical, packaging, construction, automotive, and many more, giving engineers critical materials information in an area which has traditionally been more limited than conventional polymers. In addition, the book uses recent patent information to convey the latest applications and techniques in the area, thus further illustrating the rapid pace of

development and need for intellectual property for companies working on new and innovative products. Some people will stop at nothing to get what they want...
Formerly homeless hustler Bianca Thomson-Wingarden had it all planned out. She found a rich man to get her pregnant and marry so she could give her child a lavish life of financial security she'd carefully prepared for. She and her new husband Elvin Wingarden III,

heir to the Wingarden billion-dollar dynasty, have the perfect life. They split their time between their upscale condo in the city and their lavish 17-bedroom mansion in the country. They drive the latest luxury vehicles. They don't have to worry about money and she can shower their daughter Evie, their little dog, and their friends with everything they desire. The trouble is, their perfect life is about to fall apart.

Elvin is no longer the charming man she married. And when Elvin's mother decides to hire the mysterious Penny as a live-in nanny to help take care of little Evie, everything starts going wrong in Bianca's life. She gets a terrible suspicion that the new nanny is there to replace her. And why does that nanny look so familiar? A thrilling suspense filled with dark family secrets,

popularity contests, and deception. New York Magazine The Rosen Publishing Group, Inc In Fault Line, Sarah Andrews' seventh absorbing mystery, forensic geologist Emily Hansen finds herself in a heavenly situation-for a geologist, anyway. Here, Salt Lake City, on the verge of hosting the Olympics, is hit with a major earthquake, Em's first; she's delighted to

see her science at work live and in color instead of in a lab like usual. Not that it's all fun and games-the quake is minor in terms of damage, but the specter of the possibility of a much larger disaster looms. And the geological event brings her a job. For the past few months while trying to move forward in her relationship with her boyfriend, Ray, a cop in Salt Lake, Em has been consulting for and training

with the FBI as an unofficial investigator; when a state-employed geologist is murdered hours after the quake, the Feds ask Em to put her special brand of detection skills to work on the case. The disaster already has the local government types edgy, and a murder at the height of the emergency gets even the governor's attention. Em must use all the investigatory tools in her arsenal to

uncover what in the dead geologist's life- earthquake related or not, professional or personal-could have made her the target of a killer. Action-packed and tensely written, *Fault Line* is as much about the very real effects of an earthquake on our modern lives as it is about the science of finding a killer. [Fault Line](#) MotorBooks International The most-trusted film critic in America." --

USA Today Roger Ebert actually likes movies.  Raising an

almost perfect pet does not happen by accident.
 When people acquire pets, they may not be certain about what to expect, but few anticipate the problems that can result--including expenses, health care issues and bad behaviors--or the emotional investment that comes with a true commitment to another living being.
 Being prepared, having realistic expectations,

and raising pets with desired outcomes can make the experience one to be treasured.
 This handbook is a complete guide to dog and cat care aimed at pet owners wishing to raise healthy, happy pets and to foster a lasting, loving relationship with their four-legged friends.
