A special edition of Jaws by Peter Benchley reissued with a bright retro design to celebrate Pan's 70th anniversary. It was just another day in the life of a small Atlantic resort until the terror from the deep came to prey on unwary holiday makers. The first sign of trouble - a warning of what was to come - took the form of a young woman's body, or what was left of it, washed up on the long, white stretch of beach . . . A summer of terror had begun. Peter Benchley's Jaws first appeared in 1974. It has sold over twenty million copies around the world, creating a legend that refuses to die - it's never safe to go back in the water . . .

Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead. Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age. *The Palaeolithic Origins of Human Burial* takes a novel approach to the long-term development of human mortuary activity – the various ways we deal with the dead and with dead bodies. It is the first comprehensive survey of Palaeolithic mortuary activity in the English language. Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify ‘core’ areas of behaviour towards the dead that probably have very deep evolutionary antiquity. From that point, the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed. The core chapters of the book survey the mortuary activities of early hominins,

archaic members of the genus *Homo*, early *Homo sapiens*, the Neanderthals, the Early and Mid Upper Palaeolithic, and the Late Upper Palaeolithic world. Burial is a striking component of Palaeolithic mortuary activity, although existing examples are odd and this probably does not reflect what modern societies believe burial to be, and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene. When did symbolic aspects of mortuary ritual evolve? When did the dead themselves become symbols? In discussing such questions, *The Palaeolithic Origins of Human Burial* offers an engaging contribution to the debate on modern human origins. It is illustrated throughout, includes up-to-date examples from the Lower to Late Upper Palaeolithic, including information hitherto unpublished.

Mainstream narratives of the graphic novel’s development describe the form’s “coming of age,” its maturation from pulp infancy to literary adulthood. In *Arresting Development*, Christopher Pizzino questions these established narratives, arguing that the medium’s history of censorship and marginalization endures in the minds of its present-day readers and, crucially, its authors. Comics and their writers remain burdened by the stigma of literary illegitimacy and the struggles for status that marked their earlier history. Many graphic novelists are intensely aware of both the medium’s troubled past and their own tenuous status in contemporary culture. *Arresting Development* presents case studies of four key works—Frank Miller’s *Batman: The Dark Knight Returns*, Alison Bechdel’s *Fun Home*, Charles Burns’s *Black Hole*, and Gilbert Hernandez’s

Love and Rockets—exploring how their authors engage the problem of comics' cultural standing. Pizzino illuminates the separation of high and low culture, art and pulp, and sophisticated appreciation and vulgar consumption as continual influences that determine the limits of literature, the status of readers, and the value of the very act of reading.

DAYS 9 Blurb

A revolution is under way. Within a generation, more households will be supported by women than by men. Journalist Liza Mundy takes us to the frontier of this new economic order: she shows us why this flip is inevitable, what painful adjustments will have to be made along the way, and how both men and women will feel surprisingly liberated in the end. Couples today are debating who must assume the responsibility of primary earner and who gets the freedom of being the slow track partner. With more men choosing to stay home, Mundy shows how that lifestyle has achieved a higher status, and the ways males have found to recover their masculinity. And the revolution is global: Mundy takes us from Japan to Denmark to show how both sexes are adapting as the marriage market has turned into a giant free-for-all, with men and women at different stages of this transformation finding partners who match their expectations.--From publisher description.
